PERSONAL PROJECTS

Basic HTML Page (HTML)

- It is a pure HTML Page. This project revolves around the basic HTML tags like Headings, Paragraphs, Lists, Tables, Div, Images etc... and their usage. [↗](#)
- Hosted Link - <https://abhijeet3469.github.io/backtracking/>

Digital Clock (JavaScript)

- This Project contains the capabilities of JavaScript. During the development of this project, we connected the HTML Pages with functionalities written with JavaScript files. We used DOM functions which make our Static Application into Dynamic Application. [↗](#)
- Hosted Link - <https://abhijeet3469.github.io/project4/>

Todo List App (JavaScript)

- Todo list offers a way to increase productivity, stopping you from forgetting things, helps prioritise tasks, manage tasks effectively, use time wisely and improve time management as well as work flow
- Hosted Link - <https://abhijeet3469.github.io/project5/> [↗](#)

Blog App (React.JS & Node.JS)

- A blogging platform is a service and used to manage and publish content on the internet in the form of blog. It allows the user to create, organize and publish written and visual content online in a blog. In this project React.js is used for front-end and for back-end node.js is used.
